

## Starosta's Report

We are continuing to have more people that attend St. Vladimir's. As we do we are also needing to have more space and complete our school project. We also have to plan for the future needs for our parish and the continued participation and the support of all.

This past year through everyone's efforts and support the following accomplishments have happened.

1. The new school building is near completion.
2. Additional fencing has been installed on the west side of the cemetery.
3. The area around the billboard was grated and leveled.
4. A new septic field was built to service the school and additional buildings.
5. The festival was successful again.

There were additional items that were also done, but I can't list them all.

I look forward continuing with additional projects this year, as well the support and help of all of you.
