

Another year has passed and we continue to grow and expand. Work at the school has been completed with the exception of some improvements we will continue to address. The maintenance building has water and drain lines installed plus a bathroom framed in. Heating and cooling will be installed when we can afford to do so. Septic systems for the school and maintenance building were completed. The new Church project has the septic field installed ready to be connected when we start construction.

I want to thank all of the parish members and others who have participated in our monthly work days, spring and fall cleaning days, decorating the church and gardens, cutting the grass, maintaining our equipment, the Brotherhood and Sisterhood, the Festival committee and volunteers, the Kiosk staff, the Choir, our Alter staff and Priests. I know that I probably miss some people, and please forgive me if I did.

Finally I would like to thank all of you for making St. Vladimir's what it is, family. It has been an honor serving as Starosta.

With love in Christ

Alexei (Jack) Mitchell
